

## MTBB6X Breakout board

### Features

DB25 connector, Optical coupler, 5 input signal, 12 output signal, 5V DC operating voltage

### Input/output signals

Input signal P10, 11, 12, 13 & 15 are used for 5VDC device like inductive, capacitive & mechanical home/limit switch  
Output signals P1 ~ P9 and P14, 16, 17 are used to output step/pulse signal for stepper/servo motors

6 feet Parallel cable included with each breakout board
